

## Child and Family Support Services:

**Empower U. is a learning organization that provides youth and family empowerment programs. Our values are simple. We seek to empower others by being empowered ourselves. This empowerment comes from specialized training and the free-flowing exchange of information, which, in turn, translates into stronger service to children and families. As an organization, we strive to spark the kind of innovation that communities and the families living in them will benefit from both in the present and in the future.**
