

COUNSELING PROFESSIONALS OF SOUTHERN NJ

SERVING SOUTH JERSEY FAMILIES

Each member of the CPSNJ professional team has earned a Master's degree or higher and is licensed to independently practice clinical work in NJ. Additionally, each clinician has also had someone within their network of family or friends impacted by mental health or child related behavioral/emotional concerns. This gives our team a unique perspective in working with families, resulting in a *compassion* and *sensitivity* that is unlike other agencies. Our professional staff will make it their priority to understand how each situation is uniquely affecting every child, parent and other family members.

Our work is always *confidential* and privacy is protected at all times.
