## About Us

ChoicePoint Health is a revolutionary tech-enabled company in the behavioral health and addiction treatment space focused on addressing the ever-worsening substance use and mental health epidemic. Our staff is composed of experienced professionals with over a century of experience in the treatment field, all dedicated to helping this vulnerable population facilitate change and wellness.

We aim to increase access to high quality, flexible, and convenient care by combining our team of experienced professionals, state-of-the-art technology, and efficient and effective evidenced based clinical and medical interventions.

We aim to provide high quality care to diverse populations regardless of payment type, physical location, or socioeconomic background, and remove all barriers to treatment when it is needed most.

Our tech-enabled platform allows clients to provide real time data and feedback, allowing ChoicePoint to track, intervene, and improve outcome results. For the first time ever, our technology allows our patients to experience a precise level of care and treatment, with verifiable and improved long-term success that has never been seen before.

### Administrative Staff:

Dedicated Behavioral Health Support Staff

# “Wellness For All”

## Why are we different?

The #1 reason for Americans not receiving the behavioral health care treatment they so desperately need is accessibility. ChoicePoint is designed to meet the needs and facilitate change for the modern consumer seeking treatment, while maintaining compliance and ethical standards of a longstanding system. Whether virtual, in-person, or a hybrid of both, ChoicePoint is here to meet those suffering, wherever they may be.

Our virtual care platform allows clients to conduct treatment in a manner that is compatible with their lives. Whether it be inaccessibility due to lack of transportation, lack of insurance, or concerns about confidentiality, ChoicePoint removes all barriers, while providing higher-quality outcomes than those compared to the outdated standards of care.

We utilize our unique programming and combination of medical and clinical services to reduce hesitations for those entering treatment, build a strong therapeutic relationship throughout the continuum of care, and improve outcomes to improve industry efficacy and reduce overall industry costs of care.

## Levels of Care:

- Medication Assisted Treatment
- Ambulatory Detoxification (ASAM Level I-D and II-D)
- Intensive Outpatient Treatment (ASAM Level of Care 2.1)
